DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3,5,8-10,12 and 15-22 rejected under 35 U.S.C. 102(b) as being anticipated by Sim (USPN 5,656,946). Sim discloses, in Figs. 2C and 3, a circuit "for generating a plurality of potentials as bias potentials (Vcc and Vss) and generating each of the potentials by switching between a bias potential (Vcc1, Vcc2) and a standby potential (Vss1, Vss2)" comprising: "a potential restoration circuit (33 and the corresponding transistor element 17)"; "a drive control circuit (34 and the corresponding inverter element 17)" having "an oscillating circuit (providing \varnothing)", all connected and operating similarly as recited by Applicant.

Claims 4, 6, 7, 11 and 13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
